# Cellulitis

## Symptoms

---

- + Severe swelling in the legs, hot or warm and with the possibility of making an impression with your finger in it ("pitting edema").
- + Traces of a wound or a breakage in the skin due to an underlying cellulitis, which results in one or several wounds.
- + Lameness
- + Apathy
- + Fever

# Cellulitis

## Measures

---

+ Contact the vet

+ Measure the temperature to check for fever

+ Cool down the legs with either cold hosing, alternating warm- and cold water therapy, osmotic dressing that have the effect of drawing fluid out, hydrotherapy and exercise such as regular walks.

+ Do not apply any topical or other treatments without your vet's consent.
